

§ 764.10 Information collection.

The information collection requirements contained in §§ 764.21 and 764.25(b) have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1029-0030. The information required in § 764.21 is necessary to allow the regulatory authority to develop a data base and inventory system to evaluate whether reclamation is feasible in areas covered by petitions. The information required in § 764.25(b) is necessary to allow the regulatory authority to determine, when a permit application is filed, whether it includes any areas designated as unsuitable for surface coal mining.

§ 764.11 General process requirements.

Each State shall establish a process enabling objective decisions to be made on which, if any, land areas of the State are unsuitable for all or certain types of surface coal mining operations. These decisions shall be based on competent, scientifically sound data and other relevant information. This process shall include the requirements listed in this part.

§ 764.13 Petitions.

(a) *Right to petition.* Any person having an interest which is or may be adversely affected has the right to petition the regulatory authority to have an area designated as unsuitable for surface coal mining operations, or to have an existing designation terminated. For the purpose of this Action, a person having an interest which is or may be adversely affected must demonstrate how he or she meets an "injury in fact" test by describing the injury to his or her specific affected interests and demonstrate how he or she is among the injured.

(b) *Designation.* The regulatory authority shall determine what information must be provided by the petitioner to have an area designated as unsuitable for surface coal mining operations.

(1) At a minimum, a complete petition for designation shall include—

(i) The petitioner's name, address, telephone number, and notarized signature;

(ii) Identification of the petitioned areas, including its location and size, and a U.S. Geological Survey topographic map outlining the perimeter of the petitioned area;

(iii) An identification of the petitioner's interest which is or may be adversely affected by surface coal mining operations, including a statement demonstrating how the petitioner satisfies the requirements of paragraph (a) of this section;

(iv) A description of how mining of the area has affected or may adversely affect people, land, air, water, or other resources, including the petitioner's interests; and

(v) Allegations of fact and supporting evidence, covering all lands in the petition area, which tend to establish that the area is unsuitable for all or certain types of surface coal mining operations, pursuant to specific criteria of sections 522(a) (2) and (3) of the Act, assuming that contemporary mining practices required under applicable regulatory programs would be followed if the area were to be mined. Each of the allegations of fact should be specific as to the mining operation, if known, and the portion(s) of the petitioned area and petitioner's interests to which the allegation applies and be supported by evidence that tends to establish the validity of the allegations for the mining operation or portion of the petitioned areas.

(2) The regulatory authority may request that the petitioner provide other supplementary information which is readily available.

(c) *Termination.* The regulatory authority shall determine what information must be provided by the petitioner to terminate designations of lands as unsuitable for surface coal mining operations.

(1) At a minimum, a complete petition for termination shall include—

(i) The petitioner's name, address, telephone number, and notarized signature;

(ii) Identification of the petitioned area, including its location and size and a U.S. Geological Survey topographic map outlining the perimeter of the petitioned area to which the termination petition applies;
